Activated charcoal

Activated charcoal is a natural product obtained by calcination and treatment (injection of air and water vapor) of organic plant material. This activation treatment aims to develop the charcoal porosity and greatly multiplies its surface area, which gives it a strong absorption capacity. It therefore has the property of fixing unwanted toxic substances in the body, including the gas that is trapped in the bowel. Activated charcoal is a powerful cleaner that can absorb up to one hundred times its volume in gas. It remains in the intestine and is evacuated during bowel movement.

Consuming Léo Désilets maitre herboriste Activated Charcoal helps relieve bloating and flatulence by eliminating gas due to fermentation in the intestine.

If this product is experiencing increased interest in recent years it is due to its natural origin and its effectiveness, however, it was already known before antiquity. They found traces of its use among the Egyptians and the Greeks, where it was employed as an antidote or treatment of drinking water.

More recently, the first scientific studies of the early 19th century demonstrated its strong absorption capacity and endorsed its use for the treatment of poisoning. Activated charcoal is still used in medicine for this purpose today. Indeed, it is considered one of the most effective absorbents on the market.

MEDICINAL INGREDIENTS

Each capsule contains: Activated charcoal 225 mg

NON-MEDICINAL INGREDIENTS

Gelatin

RECOMMENDED DOSE

Adults and Children 12 years and older:

- Take 3 to 4 capsules as needed after meals. May be repeated in 2 hours.
- Do not take more than 17 capsules in 24 hours.

PRECAUTIONS AND WARNINGS

- Do not use in children under 12 years of age except on the advice of a doctor.
- Do not use within 2 hours of another medication as the effect of the other medication may be reduced.
- Ask a doctor or pharmacist before use if you are pregnant or breastfeeding.
- Stop use and ask a doctor if symptoms reoccur or last more than 2 weeks.
- Keep out of reach of children. In case of overdose, call a poison control centre or get medical help right away.

OTHER INFORMATION

- Do not use if the safety seal is broken or missing.
- Store at room temperature between 15°-30°C (59°-86°F).

Léo Désilets Maître Herboriste selected Activated Charcoal obtained from peat moss, as a medicinal ingredient in their capsules.

LEO DESILETS

Léo Désilets Master Herbalist is an entirely Quebec owned and operated natural products firm based in Scotstown in the Eastern Townships. It began operations in 1974 when the founder launched his premier product: Balsam Fir Gum

Our production methods meet the requirements and quality standards of Health Canada's Good Manufacturing Practices (GMP).

We produce a wide range of natural health and skincare products, which are available through our website as well as most natural health stores and some pharmacies.

Our mission: to offer high quality natural health and skincare products to help you take care of your health in a natural way.
